

Founded over 25 years ago, Premiere Financial Consultants, Inc. is a boutique consulting firm specializing in creating strong advisory relationships with entrepreneurial ventures, closely-held businesses and high net-worth individuals.

We are a high-touch, small-volume boutique firm, allowing us to make every client our top priority.

Our services fall into four categories:

OUTSOURCING SERVICES

We can act as your entire finance and accounting departments, from the duties of the Chief Financial Officer to Controller and down through clerical functions. These services will be tailored to suit each client's unique needs. The goal is to provide the financial expertise needed to enhance stakeholder value, allowing management to concentrate on their business and servicing clients.

BUSINESS VALUATION SERVICES

When the value of a business interest (such as common stock, preferred stock, partnership interests, etc.) is required, yet the specific interest is not traded on a national exchange, we will put our decades of valuation expertise to work for you in order to render an objective and independent assessment.

VALUATION-BASED CONSULTING

The primary goal for management of any business is to create, protect and increase value for its stakeholders. We have combined our Outsourcing Services and Business Valuation expertise to assist you in developing and implementing the strategies designed to maximize shareholder value and improve tactical decision making.

ACCOUNTING AND TAX SERVICES

We offer a full range of accounting and tax services including: income tax planning, estate planning, sales tax nexus research, tax return preparation, and preparation of financial statements.
